## LED-Solar-Streetlighting for Mali

KLSA provides LED-Solar-Streetlighting for the "Mali-Hilfe e.V." and thus supports charitable projects in Mali. Because Mali is a poor country in the Sahel zone and almost two-thirds are made up of the desert (Sahara), many villages are dependent on social projects.

The ambition of the project is to illuminate social facilities, such as schools, hospitals or grain storage to make them safer with the local available means. In the pictures you can see how some villagers are mounting the lamps. Further projects are planned for the future.
